### How to Avoid Losing a Pet in a Category 5 Disaster

And what to do if you find abandoned pets in the aftermath.

**You can harness the power of the Category 5 storms in your life or business to thrive, whether it's actual flooding in the streets, drowning in debt, or having the roof blow off of a relationship.**

Christine Perakis brings order to chaos as a lifelong professional rescuer, using her business acumen as an attorney, entrepreneur, and certified executive coach, combined with serving as a certified mountain rescuer, EMT, 100-ton-licensed boat captain, and world-champion yacht racer. Perakis leveraged these talents to create her small business survival guide, the bestselling book, *The Entrepreneur's Essential Roadmap*.

For 25 years, Christine has been dedicated to ensuring that small business owners don't have to "go it alone." Yet, she was alone in her home in the Caribbean when the most powerful storm ever recorded in the Atlantic Basin, blew the roof off her house, destroyed everything in it, and left her without running water, electricity, and telecoms for months. . . For almost 24 hours, she was trapped in a "wind coffin" from the pressure of the storm, and no one was coming . . . Suddenly, Christine was the one who needed saving.

**Christine experienced and observed a phenomenon she coined and shares in the media: *Category 5 Syndrome*. It's the catastrophe after the catastrophe that most people don't realize they need to prepare for!**
